

USING ONLY AN HTML OR TEXT EDITOR create short resume on a two-page, static web site. At a minimum, the web page should make use of the required elements:

Page One (Purpose - Informational):

- Headings and paragraphs
- An ordered or unordered list
- A picture of yourself
- A horizontal rule
- A table for layout
- Emphasized and Bolded text
- A link to the second page

Page Two (Purpose - Contact):

- Headings and paragraphs
- A table for layout
- A form through which potential employers might contact you (non-functional)
- Use HTML5 FORM elements:

- Textboxes
- Checkboxes
- Radio buttons
- Listbox
- Email
- Date
- Range
- Tel
- Submit and Reset

- Link back to the first page

Name page one "index.html".

Specify an appropriate document type declaration.

Comment your code.

Place your picture in a subfolder named "graphics".

Tip: Be sure your file references are in a relative form. The site should work when copied to any directory.

Submit via Black Board a compressed file consisting of two html files and the subfolder which contains the graphics file. Name the compressed *folder Exer1-Lastname* where Lastname is your last name.
